Selected Wikipedia Article: United States Senate

I am a political science major who would like inform others of how our senate functions in the United States through the United States senate wikipedia page.

Page 1: What Is the Senate?

- Brief introduction to the Senate and its role in the U.S. government.
- Explain its relationship with the House of Representatives.
- Highlight key facts: 100 senators, two per state, and six-year terms.
- Large image of the U.S. Capitol or Senate chamber with introductory text.

Page 2: How the Senate Began

- Origins of the Senate during the Constitutional Convention of 1787.
- The Connecticut Compromise and equal representation of states.
- Establishment of the Senate in 1789.
- The 17th Amendment and the introduction of direct Senate elections in 1913.
- Visual timeline showing important developments.

Page 3: Terms and representation

- Qualifications required to become a senator.
- How Senate elections and staggered six-year terms work.
- Political parties, majority and minority leadership.
- Interactive map of the United States showing Senate representation by state.

Page 4: What Does the Senate Do?

- The Senate's role in creating and passing federal laws.
- Confirming presidential appointments, including Supreme Court justices.
- Approving treaties and conducting impeachment trials.
- Visual diagrams explaining the Senate's different responsibilities and the legislative process.

Page 5: How It Operates

- Daily Senate sessions, committees, debates, and voting procedures.

- Filibusters and cloture.
- The roles of Senate leadership and the vice president.
